

fee will be charged for Government projects.

(c) *United States/foreign industry consortium projects.* This involves U.S. companies, which have formed a consortium or any other type of association with foreign companies, that desire tests on aerospace projects of joint or foreign interest. An application for work for such a consortium shall disclose the foreign interest in or anticipated foreign benefit from tests to be conducted and shall first be reviewed by the Director, International Affairs Division, for consistency with current U.S. foreign policy and for compatibility with section 102 of the National Aeronautics and Space Act of 1958, as amended, prior to a final decision being reached on the application. A fee will be charged for these consortium projects unless, in these review procedures, it is determined that Government agency cooperative sponsorship warrants a non-fee arrangement.

(d) *Foreign company projects.* Foreign company requests for wind tunnel use that are not related to U.S. Government or U.S. industry interests or programs will generally not be granted and will in no event be granted prior to a review, as required in paragraph (c) of this section, by the Director, International Affairs Division.

§ 1210.3 Priorities and schedules.

(a) *Priorities.* Unitary wind tunnels shall be available primarily to industry for development work. However, allocations of wind tunnel time shall be in accordance with the public interests, with due consideration to the requirements of the military services, civilian needs, and NASA research. Research work shall have priority in all other NASA facilities.

(b) *Schedules.* Schedules showing the allocation of testing time for Government projects and for company projects for unitary wind tunnels and other major wind tunnels will be established by the appropriate center.

§ 1210.4 Company projects.

(a) *Initiation of company projects.* Company projects will be initiated by a letter to the Center Director followed by a conference between company and NASA representatives at the center

having responsibility for the facility proposed for the project. The company representatives will be required to explain the technical need for the project and why the NASA facility is required, as well as to define the extent of the test program, model and equipment requirements, and schedule. The center shall maintain a file of all company requests and their disposition. The company will be required to provide a Safety Analysis Report (SAR) describing potential hazards that the company test program, model, and equipment may present to NASA facilities and personnel, and other documentation required by the facility management to assure that safety requirements are met.

(b) *Scheduling of tests.* In scheduling time for company projects, the responsible NASA center will consider the merits of all projects, including government, company, and NASA research work relative to the national interest and priorities specified in § 1210.3. Every reasonable attempt will be made to accommodate technically justifiable projects on as timely a basis as possible.

(c) *Fees for company projects.* The policy on charges for the use of NASA facilities is explained in NASA Management Instruction 9080.1, "Review, Approval, and Imposition of User Charges." The fee imposed for a company project will cover all direct and indirect costs to NASA for the wind tunnel test.

(1) *Occupancy time charge.* (i) The occupancy time will be computed from the start of installation of the test article in the wind tunnel test section through the time that the test article is removed from the test section and the test section is restored to its original condition.

(ii) The occupancy time rate will be determined in accordance with NASA Management Instruction 9080.1.

(2) *Energy/Fuel.* The charge for energy/fuel will be determined from the energy/fuel consumed during the tests and the actual cost to NASA.

(3) *Data reduction.* The cost of data reduction and the data report will include labor, materials, computational costs, and appropriate indirect charges
